

# APACS Web Suite

## Mobile/Desktop browser based components

- Access APACS software functions with no software to install
- Can be used on any device with a standard web browser
- Fast loading, easy to use
- Single page application, no plug-ins required
- Full support of APACS Permissions
- User customizable

## APACS Functions via Web Browser

Now you can have APACS Access Control and Alarm Monitoring functions anywhere you want with APACS Web Suite of applications. Using any standard web browser, users can access APACS functions by simplifying launching a browser on their desktop or mobile device. The Web Suite communicates with APACS API to deliver real-time information that provides full restrictions and partitioning as defined in APACS Permissions.

APACS Web Suite offers:

Event Reports - Full featured report creation.

Cardholder Management - Add, Modify, Delete users and cards

Real-Time Event Monitoring - Monitor events as they happen in the system

Reader Control - Change the status or control of readers and doors

Live Checkpoint - Display user information as they pass system readers

# FEATURES

Date	Type	Code	Cause	Source Label	Li
10/10/2016 11:26:34 AM	Alarm	Forced open	Secure	MultiClass	
10/10/2016 11:26:59 AM	Access	Access granted	(No additional in...	MultiClass	Brai
10/10/2016 11:27:03 AM	Access	Access granted	(No additional in...	Bio	Brai
10/10/2016 11:32:14 AM	Alarm	Forced open	Alarm	MultiClass
